1 中心管系列/Permeate Pipe ▶▶▶

★工业中心管系列/for industrial

产品概述

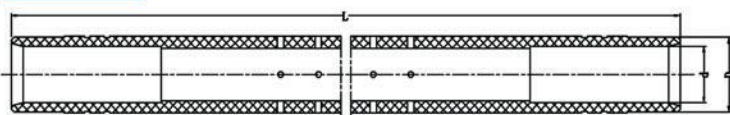

Products Introduction

产品原材料为进口优质食品级ABS，整个加工过程符合食品级卫生要求。其内外表面光亮、清洁、无杂质；超高直线度和加工精度；长度尺寸稳定可控。

The raw material is food grade of ABS, and the whole process comply with food hygiene requirements. Its inner and outer surface are bright, clean, free of impurities, with good straightness and machining precision. The length and size are stable&controllable.

★家用中心管系列/for household

产品概述

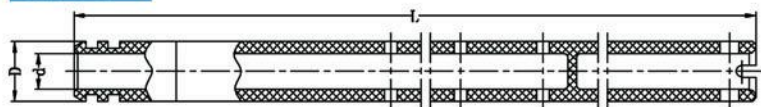

Products Introduction

产品原材料为进口优质食品级ABS，整个加工过程符合食品级卫生要求。产品采用一次性注塑成型，尺寸稳定，外表加以精致火花纹处理。产品端部形状有六角型和U槽型两种不同结构方式供您选择。

The raw material is food grade of ABS, and the whole process comply with food hygiene requirements. The product adopts one-time injection molding, with stable size. The appearance is processed by exquisite spark. For product end, there are two types structure for choice: Hexagonal or U shape.

2 连接器系列/Connector

产品概述

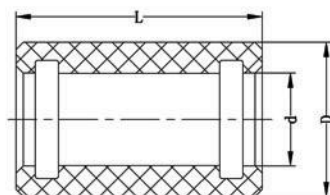

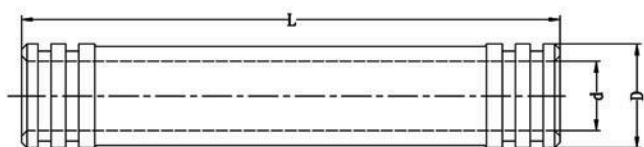

Products Introduction

产品原材料为进口优质食品级ABS，整个生产加工过程符合食品级卫生要求。各款连接器可与密封圈成套提供。

The raw material is food grade of ABS, and the whole process comply with food hygiene requirements. Each connector can be provided with a sealing ring.

3 浓水隔网系列/Spacer Net

产品概述

Products Introduction

滤网(PP浓网)产品采用专用模具以固定角度丝状网格缠绕成型。产品网格角度一致，克重均匀，丝束较细，质地柔软。并有多种尺寸规格可供客户选择，外形宽度可根据客户要求定制。

The mesh (PP thick mesh) is filamentous grid-winded by a special mould in fixed angle. The angle of the grid is consistent, it has uniform gram and soft property. There are many specifications to choose for customer, the width can customize according to customer's requirements.

5 橡胶密封圈/Rubber Seals▶▶▶

产品概述

Products Introduction

根据客户需求，我司提供与中心管，端盖及连接器配套使用的橡胶密封圈。

According to customer's requirements, we provide rubber seals which used for matching permeate tubes, end caps and connectors.
